- Providing access to

the best performing hedge funds and mutual funds in the industry

Quantitative factors (return, volatility, sharpe ratio, max drawdown, assets under management...) and qualitative factors (manager's qualifications, team's qualifications, investment process...) are used to determine those industry leading hedge funds and mutual funds.

FFA Asset Management

FFA Asset Management offers expertise across wealth management disciplines to help clients advance towards their goals by:

- Consistently keeping clients informed
- Focusing on risk-adjusted returns
- Rapidly adjusting to tactical opportunities and risks
- Standing by clients through market cycles
- Understanding that clients' needs are of paramount importance
- Focusing on clients' needs

The Relationship Manager along with the FFA Asset Management team meets with the investor to discuss his goals and investments style:

- Focusing on client service and business ethics
- Identifying and matching the risk tolerance and return requirement to a diversified asset mix

Discretionary Management Advantages

Delegation: The discretionary mandate is suitable for investors who prefer to delegate the management of their assets to a professional portfolio manager.

Diversification: A well diversified portfolio helps reduce investment risk and optimize performance.

Information: Regular performance reports and updates are sent to the client

Diversification can help an investor manage risk and reduce the volatility of an asset's price movements. Remember though, that no matter how diversified your portfolio is, risk can never be eliminated completely. You can reduce risk associated with individual stocks, but general market risks affect nearly every stock. So it is important to diversify also among different asset classes. The key is to find a balance between risk and return; this ensures that you achieve your financial goals while still getting a good night's rest

Steps to construct a portfolio

I. Understand:

Risk Profile: Risk tolerance &

risk capacity

Return Requirement: Absolute

return/relative return

II. Propose:

One of four investment strategies

(minimum investment: USD250,000)

Tailored investment solutions

(starting: USD 1,000,000)

III. Implement:

Selection of investment solutions

Periodic reviews & reallocation

IV. Review:

Review of investment results

Review of investment profile

Strategic Asset Allocation

The primary goal of a strategic asset allocation is to create an asset mix that will provide the optimal balance between expected risk and return for a long-term investment horizon. By investing in more than one asset category, one will reduce the risk of loss and the portfolio's overall investment returns will have a smoother ride. Investment horizon is long-term.
